

Title: e-Learning, Corporate Learning

Author: Íñigo Babot

Collection: Los libros de Infonomia! (Infonomia books)

Publishing House: Gestión 2000 (Grupo Planeta) (Planeta Group)

Date and Place of publication: Barcelona, 2003

About the Text

Whatever is the economic moment and the stock exchange market behaviour, the truth is that the communication channels originated by the application of New Technologies are making a great impact on numerous activity sectors. Although the process is not as quick as forecasted by some people, the changes that are taking place are deep and irreversible: they have a great effect on the way the World is seen and understood and there is no coming back from this. One of the most affected areas is Education as a whole.

The Internet, interactive digital television, teleconference and the modern information systems, in general, are opening a wide range of possibilities for education, unseen before, which work as a potent and extraordinary complement for the present teaching tools. This book is about all this and it is mainly focused on *e-Learning* (Electronic teaching at distance).

The text is intended to be highly didactic (not technical at all), with simple explanations and accessible for anyone interested in the subject, whatever is their previous knowledge in the matter.

At the same time, this book is the result of an intensive net work: 19 credited experts in *e-Learning* from 9 different countries (USA, Japan, France, Germany, England, Mexico, Argentina, Chile and Spain) have collaborated disinterestedly with the author, contributing with their vast knowledge, advice and time, to help in writing the book final version. They are some of the authentic protagonists of this educational revolution: the real authorities in this sector.

Acknowledgments

Most credited international specialists have collaborated directly (through texts or/and documentation) or indirectly (through advice and suggestions) in writing this book.

Our thanks are due to the following for their direct contribution: Thomas J. Allen and Richard C. Larson (Massachusetts Institute of Technology, MIT), Pekka Himanen (Berkeley University of California and Stanford University), Ramiro Montealegre (University of Colorado at Boulder), Robert Madge (Madge Networks Inc.), John Weeden (Weeden Design Inc.), Bouko Noor (Net Dimensions), Gerardo Tobías (Instituto Tecnológico de Monterrey, ITESM), Pablo Aristizábal and Guillermo Le Fosse (Competir and Universidad de Buenos Aires), Matthias Rùth (Tradium GmbH), Yuriko Shibue (Universidad de Doshisha, Kyoto), Sergio Vásquez (GECOSA-UOC and ESCP-EAP París), Javier Martínez (Talentus Chile), Victoria Fernández (ielearning, Instituto de Empresa) Luis Horcajuelo y Jordi Martí (IQS, Universitat Ramón Llull), Sebastián Barajas (Learning Works) and Ignasi Tebé (Grupo ISMI).

We are also grateful to Roger C.Schank (Carnegie Mellon University) and to Enric Julià (IQS, Universitat Ramon Llull) for open roads to me.

I World like to congratulate *Picpus* for illustrating this book.

And last but not least, I would like to thank Alfons Conrella for giving me the opportunity of participating in all this and for creating something so great as Infonomia!
